

Step 1) Check that all pieces are present. If you find a piece missing or broken please contact your place of purchase immediately for a replacement. In this package is:

- 1 x DTXCABGRAB2.
- 2x Security adaptors (short suit UT6; long suit DT602) (*supplied joined on sprue*).
- 2x Mounting screws 8Gx20mm (used to secure CAB GRAB to bench work).
- 1x 6G Phillips head screw (used for security adaptor).

Step 2) Secure your new CAB GRAB to the bench work of your layout, or your preferred surface using the 2x 8G mounting screws.

**Do not overtighten screws. Overtightening may cause damage to product.**

**ANTI-THEFT LOCKING** - OPTIONAL (Not compatible with legacy controllers).

1. Using a sharp modeling knife or cutters, separate the two adaptors from the sprue.

*Long adaptor suits DT600/602 series.*

*Short adaptor suits UT6 series.*

2. Unscrew lanyard adaptor

3. Remove lanyard adaptor

4. Insert anti-theft adaptor and secure with original screw.

5. When you are ready to lock your controller/throttle to the CAB GRAB, simply screw in the supplied 6G x 15mm screw.
