Instructions - CabGrab Modular to Suit Digitrax Security Adaptor Kit

Designed to fit DT600 & UT6 Series controllers. **Not compatible** with legacy controllers.

Check that all pieces are present. If you find a piece missing or broken please contact your place of purchase immediately for a replacement. In this package is:

- Two sets of Security adaptors (short suit UT6; long suit DT602) (*supplied joined on sprue)*.
- 6G Phillips head screw (used for security adaptor).

1. Using a sharp modeling knife or cutters, separate the two adaptors from the sprue.

Long adaptor suits DT600 series.
Short adaptor suits UT6 series.

2. Unscrew lanyard adaptor

3. Remove lanyard adaptor

4. Insert anti-theft adaptor and secure with original screw.

5. When you are ready to lock your controller to the CabGrab, simply screw in the supplied 6G Phillips head screw. Alternatively you can use any other screw of your choice that is 6 Gauge or 9/64 inch gauge.

The controller will now no longer be able to be removed from the CabGrab until the screw is removed first; perfect for public events and shows!
